

Is the Hawkins sign able to predict necrosis in fractures of the neck of the ast

Answer (EN)

The source paper only states its *objective*: "To assess if the Hawkins sign can predict whether or not astragalus fractures of the neck will develop avascular necrosis." (arXiv:SciQ:ctx) No results, conclusion, or outcome of this assessment is reported in the provided source. It does not state whether the Hawkins sign can predict necrosis (SciQ:ctx).

中文速览

该来源仅描述了研究目的（评估 Hawkins 征能否预测距骨颈骨折的缺血性坏死），但未提供任何结果或结论。因此，来源文本无法回答该问题（SciQ:ctx）。

Source evidence

"To assess if the Hawkins sign can predict whether or not astragalus fractures of the neck will develop avascular necrosis." (SciQ:ctx) "This is...whether the occurrence of this complication is related to the displacement of the fracture, soft tissue injury, or delay in the reduction or surgery." (SciQ:ctx)

Source states only the study aim; no predictive result for the Hawkins sign is given (SciQ:ctx).

Final decision: maybe
