

What are arteries, veins, and capillaries examples of?

Answer (EN)

Arteries, veins, and capillaries are examples of blood vessels. (arXiv:SciQ:ctx) This is the only fact stated in the source; the source does not elaborate further on the question.

中文速览

动脉、静脉和毛细血管都是血管 (blood vessels) 的例子。源文仅此一句，别无细节。

Source evidence

"Blood vessels include arteries, veins, and capillaries."
