

GPT detectors bias against non-native English writers

2304.02819

Abstract

Mock LLM response (EN): research_foodie is a local-first proactive research pipeline. 回复 (中文) : research_foodie 是一套本地优先的主动式学术研究流水线。

Intro

Mock LLM response (EN): research_foodie is a local-first proactive research pipeline. 回复 (中文) : research_foodie 是一套本地优先的主动式学术研究流水线。

Evidence Table

#	Claim (abridged)	Source	Confidence
1	Widely-used GPT detectors consistently misclassify non-native English writing samples as AI-generated.	arXiv:2304.02819	high
2	Simple prompting strategies can mitigate the bias and bypass GPT detectors.	arXiv:2304.02819	high

Outline

- Background: Detectors misclassify non-native prose as AI-generated
- Mitigation: Simple prompting can mitigate the bias

Claims (2)

- [high] Widely-used GPT detectors consistently misclassify non-native English writing samples as AI-generated. (arXiv:2304.02819)
- [high] Simple prompting strategies can mitigate the bias and bypass GPT detectors. (arXiv:2304.02819)
